Resilience refers to how well an individual or community can prepare for adversity or challenges. Some questions to think about are: How can future global leaders prepare their communities to respond to the global challenges of the 21st century? How does international experience affect an individual or community's ability to adapt? What are examples of resilience in a global context? This year's theme asks students to explore these questions by highlighting citizen diplomacy and the creative ways that we create peace through people-to-people interaction.
