

GLENDALÉ

Heroes Regional Park Library

Construction Now Underway!

June 2018

Contractor crews are now onsite performing earthwork and site preparation activities associated with the construction of Glendale's fourth and newest public library branch on the grounds of Heroes Regional Park near 83rd Ave. and Bethany Home Rd.

The project includes the construction of a new 7,500 square-foot library that will serve the western portion of our city's municipality. In addition to offering branch library services, facility amenities include dedicated children's and "teens only" patio areas, wi-fi capability, a dividable multi-purpose programming room, a study room, the expansion of the existing parking lot area to accommodate library visitors, the installation of enhanced outdoor area lighting and library monument signage near the entrance of Heroes Regional Park. Construction is expected to take approximately nine months and the library is slated to be fully equipped, operational and open to the public by spring 2019.

TRAFFIC RESTRICTIONS

During this work, no major traffic restrictions are anticipated; however, park visitors should expect heavier than normal traffic activity and be alert to large construction vehicles hauling or delivering materials. Work will take place weekdays during daytime hours.

Thank you for your patience during this work!
